

Handbook of **Bioremediation**

Physiological, Molecular
and Biotechnological Interventions

Edited by
Mirza Hasanuzzaman and Majeti Narasimha Vara Prasad

HANDBOOK OF BIOREMEDIATION

Physiological, Molecular and Biotechnological
Interventions

Edited by

MIRZA HASANUZZAMAN

Professor, Department of Agronomy, Faculty of Agriculture, Sher-e-Bangla Agricultural University, Dhaka, Bangladesh

MAJETI NARASIMHA VARA PRASAD

Emeritus Professor, School of Life Sciences, University of Hyderabad, India

ACADEMIC PRESS

An imprint of Elsevier

Bioremediation of inorganic pollutants

1. Concept and types of bioremediation

MENG WANG, SHIBAO CHEN, XINGYONG JIA, AND LI CHEN

1 Introduction	3
2 Concept of bioremediation—A convenient solution to the contamination of inorganic pollutants	3
3 Types of bioremediation	4
4 Challenges for bioremediation	6
5 Conclusion and future prospects	7
References	7

2. The use of industrial and food crops for the rehabilitation of areas contaminated with metal(loid)s: Physiological and molecular mechanisms of tolerance

PATRÍCIA VIDIGAL, LUÍSA C. CARVALHO, ERIKA S. SANTOS, AND MARIA MANUELA ABREU

1 Physiological and molecular mechanisms of metal(loid)s tolerance in plants	9
2 Rehabilitation with industrial and food crops	14
3 Final remarks	16
Acknowledgments	16
References	16

3. Mechanistic overview of metal tolerance in edible plants: A physiological and molecular perspective

AMIT KUMAR, ASHISH K. CHATURVEDI, U. SURENDRAN, AFTAB A SHABNAM, AJEET SINGH, S.N. VINODAKUMAR, BORSHA TAMULY, SANDEEP K. MALYAN, SHAKEEL A. KHAN, M.M.S. CABRAL-PINTO, P. RAJA, AND KRISHNA K. YADAV

1 Introduction	23
2 Status and sources of metal contamination	24
3 Positive aspects of metals in plant metabolism	24
4 Adverse impact of metal toxicity on morphological, physiological, and yield traits of edible plants	31

5 Physiological and biochemical mechanism favored by plants for metal toxicity	34
6 Enhancing metal toxicity tolerance in edible plants	36
References	40

4. Phytoextraction of heavy metals by weeds: Physiological and molecular intervention

PANKAJ PATHAK AND DEBLEENA BHATTACHARYA

1 Introduction	49
2 Different weeds used for phytoextraction	50
3 Physiological mechanism for removal of HMs	51
4 Molecular mechanism for HM removal	53
5 Improvising weed for increasing phytoextraction	56
6 Conclusions	57
References	57

5. Phytomanagement of As-contaminated matrix: Physiological and molecular basis

SUMBAL IFTIKHAR, VEYSEL TURAN, HAFIZ MUHAMMAD TAUQEER, BILAL RASCOOL, MUHAMMAD ZUBAIR, MAHMOOD-UR-RAHMAN, MUHAMMAD ASAF KHAN, SHAMIM AKHTAR, SHAHBAZ ALI KHAN, ZEESHAN BASHARAT, IMMAD ZULFIQAR, JAVED IQBAL, MUHAMMAD IQBAL, AND PIA MUHAMMAD ADNAN RAMZANI

1 Introduction	61
2 Arsenic in the environment	62
3 Chemistry of As with P, S, and Fe	63
4 As toxicity in plants	64
5 Remedial measures for the mitigation of As bioavailability and toxicity in contaminated soils	66
6 Conclusion and future perspective	73
References	73

6. Metallothionein-assisted phytoremediation of inorganic pollutants

ADITYA BANERJEE AND ARYADEEP ROYCHOU DHURY

1 Introduction	81
2 MTs: An overview	81
3 Roles of MTs in phytoremediation of HMs	82
4 Conclusion	86
5 Future perspective	86
Acknowledgments	87
References	87

References	645	9 Potential exposure pathways	682
Further reading	646	10 Environmental transport and fate	682
		11 Transformation and degradation	684
		12 Transgenic plants	685
		References	686
41. Molecular and cellular changes of arbuscular mycorrhizal fungi-plant interaction in pesticide contamination		44. Remediation of organic pollutants by <i>Brassica</i> species	
LAÍZE APARECIDA FERREIRA VILELA AND MÉRCIA MARIA DAMÁSIO		MUHAMMAD ASHAR AYUB, MUHAMMAD USMAN, MUHAMMAD UMAIR, MUHAMMAD RIZWAN, AMER RASUL, AND MUHAMMAD ZIA UR REHMAN	
1 Introduction	649	1 Introduction	689
2 Arbuscular mycorrhizal fungi	650	2 Types, sources, and fate of organic pollutants in the environment	690
3 Effect of pesticides on diversity and development of arbuscular mycorrhizal fungi and mycorrhizal plants	650	3 Environmental concerns associated with organic pollutants	691
4 Molecular changes of mycorrhizal plants in pesticide-contaminated soils	653	4 Physiological, morphological, and biochemical aspects of <i>Brassica</i> species	691
5 Final considerations and future perspectives	654	5 Growth of brassica on contaminated soils	692
References	654	6 Mechanisms of phytoremediation in <i>Brassica</i>	692
		7 Microbial interactions of <i>Brassica</i> to remediate organic pollutants in soils	694
42. Biodegradation of explosives by transgenic plants		8 Use of organic and inorganic amendments to accelerate the phytoremediation potential of <i>Brassica</i>	695
JIPSI CHANDRA, ROSELINE XALXO, NEHA PANDEY, AND S. KESHAVKANT		9 Safe disposal of contaminated <i>Brassica</i> plants	695
1 Introduction	657	10 Prospects	695
2 Classification of explosives	658	References	696
3 Prospects for biodegradation of explosives by plants	660	45. Bioremediation of organic contaminants based on biowaste composting practices	
4 Enhancing biodegradation through genetic modification	662	FLORIN-CONSTANTIN MIHAI, RAMÓN PLANA, MOHAMMAD J. TAHERZADEH, MUKESH KUMAR ASWATHI, AND CHUKWUNONYE EZEAILI,	
5 Uptake and metabolism of explosives	663	1 Introduction	701
6 Biodegradation of TNT	664	2 Composting as a sustainable biowaste management practice	702
7 Biodegradation of RDX	668	3 Bioremediation through composting of organic wastes	703
8 Biodegradation of HMX	669	4 Land farming combined with composting of biowaste	711
9 Biodegradation of IMX	670	5 Conclusions	712
10 Biodegradation of nitrate esters	670	References	712
11 Conclusions and future prospects	671		
Acknowledgments	672	46. Bioremediation of organic dyes using plants	
References	672	M.C.M. IQBAL AND D.M.R.E.A. DISSANAYAKE	
43. Polychlorinated biphenyls (PCBs): Characteristics, toxicity, phytoremediation, and use of transgenic plants for PCBs degradation		1 Introduction	715
ANEEQA MUNAWAR, MUHAMMAD SOHAIL AKRAM, MUHAMMAD TARIQ JAVED, AND MUHAMMAD SHAHID		2 Source of organic pollutants	717
1 Introduction	677	3 Implementation	723
2 Regulatory history	678	4 Concluding remarks	723
3 Production and uses	678	References	724
4 Import/export	678		
5 PCBs as a by-product	678		
6 Chemical composition	679		
7 Sources of PCBs	681		
8 Toxicity of PCBs	681	Index	727
